

## Mach 6 Carbon / Mach 4 Carbon Lower Link Orientation

The Mach 6 Carbon and Mach 4 Carbon lower linkage is correctly oriented with the engraved arrow at the top of the link on the non-drive side, pointing toward the front of the bicycle, as shown in the drawing above. Incorrect installation will result in permanent, non-warranty damage to the bicycle frame. If you have any questions, be sure to consult your Pivot Dealer prior to attempting maintenance on your own.
