

Seatpost range:

The Mach 429 Trail features a low stand-over height and short seat tubes to allow the use of longer travel dropper posts and and/or more flexibility for a wider range of rider sizes.

There are some limitations that each dropper post can accommodate for each frame size based on the individual riders saddle height, so it is important to check fit before choosing the travel and model of dropper post for your Pivot.

Find your saddle height:

1. On a current bike with the seat at max height (basically your XC saddle height), measure from the center of the crank spindle to the top of the seat (the “x” measurement in the illustration).
2. Choose your Mach 429 Trail frame size.
3. Based on your frame size selection, you can review the chart below to select the longest travel post that you are able to run. Your saddle height needs to fall in between the “Minimum” and “Maximum” saddle height measurements listed on the chart. For instance, if you want to run a 150mm FOX Transfer post on a medium Mach 429 Trail and your saddle height does not fall between 74.4cm(29.0”) and 86.1cm (33.6”) then you need to order the 125mm post instead. For reference, small Mach 429 Trail bikes will ship with the KS 100mm dropper and all other sizes will ship with the FOX Transfer 125mm unless otherwise requested.
